

ASSESSMENT OF RISK FOR

**BRAESIDE
EDUCATION
CENTRE**

Assessment of:

High Ropes Course – Crate Stack

Location: Braeside

Assessor (please print): J Simons

Date: Feb 2021

Review Date: Feb 2022

HAZARDS	WHO MIGHT BE HARMED?	IS THE RISK ADEQUATELY CONTROLLED?	WHAT FURTHER ACTION IS NECESSARY TO CONTROL THE RISK?
List Hazards here:	List specific groups of staff / other people that are risk, e.g. visitors, young people, expectant mothers etc:	List existing control measures / systems and state how individuals at risk are notified of the control measures / systems in place:	List the risks which are not adequately controlled and the action you will take where it is reasonably practicable to do more:
<ul style="list-style-type: none"> • Height and potential for falling / getting caught up in safety rope • Falling crates • Holes in crates – finger traps etc • Participant collision • Crates swinging through the air • Sight obscured by rope • Mistakenly using dynamic ropes, instead of static. • Injury of qualified instructor – loss of instructor • Belayer fails to control system • Trips and slips on ground and platform • Structure or kit failure • Catching of Jewellery, watches, loose clothing. • Incorrectly fitted kit, or child fiddling with kit. 	<ul style="list-style-type: none"> • Braeside Staff • School Staff • Children • Youth Workers • Volunteers • Visitors 	<ul style="list-style-type: none"> • Full harness and belay supervised and monitored by qualified and assessed instructor • Users warned to turn away as crates fall / encourage “builders” to push crate stack towards the woods, away from belayers. • All persons to wear helmets in area and in activity • Users warned about getting fingers / hands / feet stuck in crate holes. • Users warned and have awareness raised of participants collision, crates swinging through the air and sight obscured by rope. • Correct PPE • 2 approved instructors to be present on site at all times. • Belayer to always be backed up by another individual, and ground anchored. • Instructors to only supervise 2 belayers at a time. • Verbal briefing of uneven surfacing. • Jewellery to be removed and suitable clothing covering arms and legs with no loose cords, laces etc to be worn. • Unreliable students to have maillon spannered tight so they cannot undo it. • Any broken / damage kit reported and removed from rope store to Managers desk. • Appropriate Safety checks each day, Month/bi-month, year
